

# DAY 1

Jordy collects butterflies. The table shows the wingspan of his favorite five butterflies.

Butterfly	Wingspan (cm)
Red Glider	5.715
Purple Swallowtail	5.218
Orea Banner	5.503
Peacock Butterfly	5.730
Great Copper	5.447

If placed side-by-side, what is the combined wingspan of the Red Glider and the Peacock Butterfly?

If placed side-by-side, what is the combined wingspan of the Red Glider and the Peacock Butterfly?

Ed bought a drink for \$1.50 and a sandwich for \$2.75. He has \$13.50 left. How much did he start with?

Mitch knew that it was 264.8 miles to the beach. After traveling 177.65 miles, how much farther did he have to go?

## DAY 2

A tabletop has the measurements 3.5 meters by 1.2 meters. What is the area in square meters? (Remember area = length x width)

If your brother cut 0.3 meters off of one side, how would that affect the area of the tabletop? Show your work

Lebron bought 7 books that were \$5.95 each. How much did he spend on books?  
Show your work.

Four games cost \$28.32. Each game was the same price. How much was each game?

# DAY 3

The table shows four people who earn the typical amount for their education level

Name	Level of Education	Weekly Income
Miley	High School Dropout	\$440.50
Niko	High School Graduate	\$650.35
Taylor	2-Year College Graduate	\$771.25
Pinky	4-Year College Graduate	\$1,099.20

- How much more does Niko earn than Miley in one week?
- If Taylor and Miley both work for 2 weeks, how much more will Taylor earn?
- How much money will Pinky earn in a month? About how long will Miley have to work to earn the same amount?

## REFLECTION – WEEK 3

Three things I learned this week

1.

2.

3.

Two examples of my learning

1.

2.

One question I have for my teacher
